Mission:

The Mission of Catholic Health Initiatives is to nurture the healing ministry of the Church, supported by education and research. Fidelity to the Gospel urges us to emphasize human dignity and social justice as we create healthier communities.

Core Values:

- **Reverence:** Profound respect and awe for all of creation, the foundation that shapes spirituality, our relationships with others and our journey to God.
- **Integrity:** Moral wholeness, soundness, fidelity, trust, truthfulness in all we do.
- **Compassion:** Solidarity with one another, capacity to enter into another's joy and sorrow.
- **Excellence:** Preeminent performance, becoming the benchmark, putting forth our personal and professional best.

Vision:

Our Vision is to live up to our name as one CHI:

- **Catholic:** Living our Mission and Core Values.
- **Health:** Improving the health of the people and communities we serve.
- **Initiatives:** Pioneering models and systems of care to enhance care delivery.

Welcome

CHI St. Alexius Health's guiding principle has always been to provide innovative, compassionate Catholic health care. Throughout the years, we have nurtured our reputation for quality care by offering the highest level of expertise and experience in the name of healing.

We are dedicated to providing an outstanding patient experience, which encompasses everything from customer service to patient-centeredness, patient safety and care coordination among providers.

Our associates' unwavering commitment to excellence inspires us to improve the health and wellness in the communities we serve.

This booklet is a reflection of the services provided throughout our regional health system.

We welcome you to CHI St. Alexius Health and look forward to being your health care provider.

Imagine Better Health

In the spring of 2016, CHI St. Alexius Health in Bismarck, Mandan, Garrison, Turtle Lake and Washburn, CHI St. Joseph's Health in Dickinson and Beach, CHI Mercy Medical Center in Williston, CHI Mercy Hospital in Devils Lake and CHI Carrington Health in Carrington and New Rockford, united under one name – CHI St. Alexius Health.

Individually, we were recognized for our passionate attention to providing exceptional patient care. By coming together and having one name in which patients place their trust, we can effectively focus on offering the same world-class experience in all of our facilities.

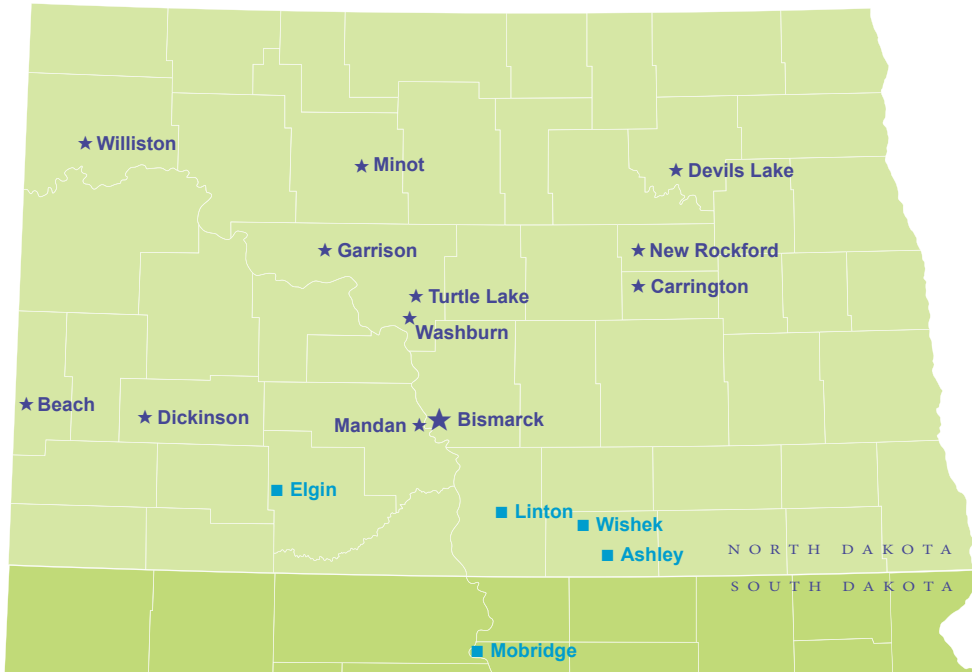

We believe uniting under CHI St. Alexius Health's name reinforces our dedication to coordinated care to the patients and their families we have the privilege of caring for.

"...many residents of this community take the quality of healthcare here for granted because it's been that way for so long. To that, I can only say that the care we received at CHI St. Alexius Health will never be taken for granted."

– A Grateful Patient

CHI St. Alexius Health is the largest delivery system in the region.

Motivated by faith, we are dedicated to living our mission of nurturing the healing ministry of the church and keeping our patients at the heart of everything we do.

Who We Are

For more information visit
CHISTAlexiusHealth.org

Family Medicine Services

Because of their extensive training, family medicine physicians treat most ailments and provide comprehensive health care for people of all ages – from newborns to seniors. They deliver a range of acute, chronic and preventive medical care services.

In addition to diagnosing and treating illness, family medicine physicians also provide preventive care, including routine checkups, health-risk assessments, sports physicals, immunization and screening tests, and personalized counseling on maintaining a healthy lifestyle. They also manage chronic illness, often coordinating care provided by other subspecialists.

To make an appointment with a CHI St. Alexius Health family medicine physician near you, please visit CHISTAlexiusHealth.org.

Women's Health Services

At CHI St. Alexius Health, we understand the unique health care needs of women at every stage of life. That is why we provide a wide variety of services to women of all ages.

At a well-woman exam, providers screen for conditions such as high blood pressure, high cholesterol, and diabetes, and perform a clinical breast exam, pelvic exam and Pap smear. It is also a time when lifestyle habits are discussed and immunizations are administered. At age-appropriate levels, screening tests like colonoscopies, DEXA scans and mammograms may be ordered.

Our women's health team will help expecting mothers with all their prenatal care needs, from the first trimester through post-partum care. We also offer consults for women struggling with fertility. Women's health addresses gynecologic concerns for women at any age, including pelvic pain, urinary concerns, fibroids or cysts, thyroid disorders, and menopausal symptoms.

Your CHI St. Alexius Health provider will help determine what services are needed to maintain your optimal health.

Men's Health Services

CHI St. Alexius Health offers a full range of health services designed to help men of all ages live stronger, healthier, and even longer lives.

There are health conditions that only affect men, such as prostate cancer and low testosterone. Many of the major health risks that men face - like colon cancer or heart disease - can be prevented and treated with early diagnosis. Screening tests can find diseases early, when they are easier to treat. It's important to get the screening tests you need.

Good health starts by asking a provider which screening tests are needed each year. Being proactive, every man can lower his risk of serious health problems by making small changes.

To find a provider who can help you live longer and healthier visit CHISTAlexiusHealth.org.

Cardiology Services

Coronary heart disease remains the major cause of death and debilitation in the U.S. More than 58 million Americans have some form of coronary heart disease, with almost 1.4 million dying annually.

Many of these deaths are preventable. That is why CHI St. Alexius Health provides the most comprehensive care in the region to patients with cardiovascular, lung and peripheral artery disease (PAD).

Our team is comprised of expertly trained cardiologists, pulmonologists, heart and vascular surgeons, diabetes educators, and interventional radiologists, as well as other highly skilled personnel.

Because each patient's circumstances are unique, our interdisciplinary approach means every patient receives the attention of a team of specialists and is treated with the utmost dignity, care and compassion.

To make an appointment with a CHI St. Alexius Health provider near you, go to CHISTAlexiusHealth.org.

Internal Medicine

Internal medicine is the medical specialty dealing with the prevention, diagnosis, and treatment of adult diseases. Physicians trained in internal medicine provide long-term, comprehensive care to older adolescents, adults, and the elderly. Internal medicine deals with common as well as complex or chronic illnesses, providing primary care through many stages of life. Internists diagnose and offer treatment for cancer, infections and diseases affecting the heart, blood, kidneys, joints and the digestive, respiratory and vascular systems. They also offer care for eyes, ears, skin, nervous system, and mental health.

Internal medicine provides in-depth care for adult concerns, whereby in comparison, family medicine is a specialty in breadth aiming to provide initial, continuing and comprehensive care. When a referral is needed, family medicine providers will often involve internal medicine specialists to provide more in-depth care for complex concerns.

To locate an internal medicine provider near you, go to CHStAlexiusHealth.org.

Neurology Services

Neurological disorders are diseases of the central and peripheral nervous system – in other words, the brain, spinal cord, cranial nerves, peripheral nerves, nerve roots, autonomic nervous system, neuromuscular junction, and muscles. These disorders include epilepsy, Alzheimer's disease and other dementias, cerebrovascular diseases including stroke, migraine and other headache disorders, multiple sclerosis, Parkinson's disease, neuroinfections, brain tumors, traumatic disorders of the nervous system such as brain trauma, and neurological disorders as a result of malnutrition.

Hundreds of millions of people worldwide are affected by neurological disorders. Approximately 6.2 million people die because of stroke each year, and more than 50 million people have epilepsy worldwide.

CHI St. Alexius Health offers the latest in neurologic care with compassion and kindness. We focus on the patient as a whole, not just looking at your neurologic disorder. We are committed to providing you with the highest level of medical care from diagnosis to treatment.

Finding a neurologist in your area is as easy as visiting CHISTAlexiusHealth.org.

Neurosurgery Services

CHI St. Alexius Health provides leading surgical care and treatment options for patients with brain, spine and nerve conditions, disease and injury. Our neurosurgery team specializes in complex spinal and cranial procedures, peripheral nerve disease, radiosurgery, pediatric neurosurgery and functional neurosurgery, and uses the latest in technology and techniques. In addition, we provide full consultative services for referring physicians.

We treat a variety of conditions including back and neck problems, brain and spinal cord tumors, carpal tunnel, vascular malformations, spinal cord injuries, traumatic brain injuries, and spinal laminectomy and fusions.

We combine expertise and advanced technology for a multidisciplinary approach to compassionate medical care. Visit CHISTAlexiusHealth.org for more information on neurosurgeons in your community.

Obstetrics and Prenatal Care

The Obstetrics team is dedicated to helping mothers prepare for and experience the delivery of their new baby. Trained teams of providers assist women through labor and delivery when their baby is ready to arrive. The staff is experienced and committed to the health and comfort of both mothers and babies in their care. Our obstetrics team teaches new parents newborn care techniques during the hospital stay, offering a caring, family-focused program with one-on-one instruction.

Education is available to expecting mothers in the months and weeks before a baby arrives, including breastfeeding classes, childbirth/Lamaze classes, and tours of the obstetrics department.

Prenatal care is important for expecting mothers, and it is one of the best things you can do for your baby. Getting early and regular prenatal care can help prevent complications and inform women about important steps they can take to protect their infant and ensure a healthy pregnancy. Prenatal care is available from a number of our women's health and family medicine physicians, physician assistants and family nurse practitioners.

To learn more about obstetric and prenatal services in your area, visit CHStAlexiusHealth.org.

Emergency Medicine Services

The medical professionals at CHI St. Alexius Health take pride in delivering quality service 24 hours a day, 365 days a year, in a timely, efficient and safe manner. We provide care to patients with urgent medical conditions ranging from complex problems such as heart attacks and strokes to simple but pressing conditions such as cuts and broken bones.

Our team includes board-certified emergency medicine specialists, nurses trained in emergency and critical care and other specialists who are called upon as needed. We care for our patients using a teamwork approach which includes caring, dedicated, competent professionals and state-of-the-art treatment, technology and equipment and by giving superior customer service.

Our mission compels us to care for all individuals who walk through our doors seeking medical care.

Therapy Services

CHI St. Alexius Health provides therapy services to pediatric and adult patients in an inpatient and outpatient setting. Our highly-trained team of physical therapists, occupational therapists, and speech therapists has achieved a reputation for excellence.

Our therapists are all licensed and experienced in each of their respective fields. All are trained in the screening, evaluation and treatment of a variety of disorders. We take pride in watching the changes that hard work can accomplish and helping patients in their full return to normal function.

We are committed to providing the highest quality of care available and utilize a collaborative approach to fulfill the needs of our patients and achieve the most effective results. Visit us at CHISTAlexiusHealth.org to learn more about our therapy services.

Pain Management Services

Different types of pain require different types of pain management options. So, whether your pain is chronic or acute, from arthritis, cancer treatments, fibromyalgia, or an old injury, we can help you find a way to get your pain under control.

CHI St. Alexius Health offers proven therapies ranging from conventional treatments to new innovations, all to most effectively control your pain. Our dedicated and caring providers specialize in managing pain and restoring function so our patients can return to a more productive and enjoyable lifestyle.

To find the nearest CHI St. Alexius Health location near you, visit our website at CHISTAlexiusHealth.org.

Radiology Services

CHI St. Alexius Health provides access to today's most advanced medical imaging services to ensure our patients receive accurate and timely results. Our capabilities include X-rays, bone-density scanning, mammography, CT and MRI, ultrasound, nuclear medicine and PET, and interventional vascular procedures.

State-of-the-art technology combined with uncompromising professional standards and a total dedication to our patients enables us to provide the most modern, safe and accurate diagnostic services available.

Diagnostic Imaging

- CT Scan
- MRI
- Nuclear Medicine
- PET/CT
- Fluoroscopy
- X-ray
- Ultrasound

Women's Imaging

- Mammography
- Breast MRI
- Breast Ultrasound
- Pelvic Ultrasound
- DEXA (Osteoporosis Screening)

Surgical Services

If you need surgery, you want to know you're in the hands of the best surgeons and surgical teams in the region.

CHI St. Alexius Health's experienced surgical teams are focused on providing patient-centered care – from your preoperative exam, to your entry into our surgical suites, to keeping your loved ones informed. We understand the anxiety that patients feel and know that details matter when it comes to ensuring patient safety, comfort and recovery.

Our physicians represent a wide range of surgical fields – from general, to plastic, to bariatric, to orthopedic, to neurosurgery – placing CHI St. Alexius Health and its medical staff among the most trusted in the region.

With the most modern technologies at their fingertips, our surgeons employ advanced surgical techniques, including laparoscopic surgery, which involves minimal incisions for less scarring and faster healing, for a minimally invasive surgery.

Home Medical Equipment and Supplies

Home medical equipment and supplies help people live active and independent lives.

We offer home medical equipment, respiratory/sleep therapy, seating and mobility solutions, home and vehicle accessibility solutions, orthotics and prosthetics and women's specialty products.

Our showrooms in Bismarck, Dickinson and Williston feature over 5,000 different items of medical products including wheelchairs, walkers, power scooters, seat lift chairs, home safety equipment, CPAP, and oxygen. We also offer exercise equipment, stethoscopes and blood pressure kits, ostomy and urinary supplies, post-mastectomy products, breast forms, compression stockings, breast pumps and supplies.

We manufacture custom-made orthotics and prosthetics in our on-site laboratory in Bismarck.

We employ respiratory therapists, nurses, prosthetists, orthotists and other highly-trained associates with extensive knowledge of medical products and services.

We take great pride in meeting our customer's needs in a friendly, efficient manner. Please visit our website to learn more about the wide variety of medical products and services we offer.

Pediatrics

Babies, children, adolescents, and young adults from birth to age 21 years are at risk for a variety of diseases, from chicken pox to RSV. No matter what ails children, they need to be treated in a way that is appropriate to their age and weight.

At CHI St. Alexius Health, our dedicated pediatricians provide preventive health maintenance for healthy children as well as medical care for children who are acutely or chronically ill. Our pediatricians manage the physical, mental, and emotional well-being of children in every stage of development – in good health or in illness.

In caring for your child, a pediatrician will:

- Do physical exams
- Give your child recommended immunizations
- Make sure your child is meeting developmental milestones in growth, behavior, and skills
- Diagnose and treat your child's illnesses, infections, injuries, and other health problems
- Give you information about your child's health, safety, nutrition, and fitness needs
- Answer your questions about your child's growth and development
- Refer to and collaborate with specialists should your child need care beyond the pediatrician's expertise.

To find a pediatric specialist near you, go to CHISTAlexiusHealth.org.

Inpatient Hospital Care

When you need surgery or hospitalization for an acute or chronic disease or illness, turn to the health care experts at CHI St. Alexius Health. With six critical access hospitals and one tertiary hospital offering a full range of hospital services, you will find the excellent care you need close to home.

Our hospital care teams are with you every step of the way during your health care journey, and provide you with everything you need from diagnosis through treatment and recovery.

Our staff is always available to discuss your treatment options, develop a safe discharge plan, support your care after leaving the hospital and answer any questions you may have.

Our hospital-based health care services include:

- Diagnosis and testing
- Dialysis
- Lab and radiology services
- Surgery
- Recovery and rehabilitation therapy
- Adult, pediatric and neonatal intensive care units
- Adult and adolescent inpatient psychiatric programs
- Medical/Surgical/Pediatric unit

Ear, Nose, and Throat

CHI St. Alexius Health's otolaryngologists are trained in the medical and surgical management and treatment of patients with diseases and disorders of the ear, nose, throat (ENT), and related structures of the head and neck. They are commonly referred to as ENT physicians.

The Ears - ENT physicians are trained in both the medical and surgical treatment of hearing loss, ear infections, balance disorders, ear noise (tinnitus), and some cranial nerve disorders. They also manage congenital (birth) disorders of the outer and inner ear. ENTs often work with Audiologists for non-surgical treatment options and hearing devices.

The Nose - Care of the nasal cavity and sinuses is one of the primary skills of ENTs. Problems in the nasal area include allergies, smell disorders, polyps, and nasal obstruction due to a deviated septum.

The Throat - ENTs have expertise in managing diseases of the throat, larynx (voice box), and the upper aero-digestive tract or esophagus, including voice and swallowing disorders.

The Head and Neck - In the head and neck area, ENTs are trained to treat infections, benign (non-cancerous) and malignant (cancerous) tumors, facial trauma, and deformities of the face. They perform both cosmetic plastic and reconstructive surgery.

A complete list of ENT specialists can be found on CHISTAlexiusHealth.org.

Orthopaedics

The most common cause of a patient's visit to an orthopaedics physician is for the treatment of a broken bone. An orthopaedic physician may also see many patients for the treatment and management of arthritis and other joint problems. Orthopaedics use both surgical and nonsurgical means to treat musculoskeletal trauma, sports injuries, degenerative diseases, tumors and congenital disorders.

Orthopaedic Services Include:

- Sports medicine
- Endoscopic carpal tunnel release
- Joint replacement of the hip, knee and shoulder
- Fracture care
- Hand and upper extremity surgery
- Foot and ankle surgery
- Advanced and pediatric care
- Primary and secondary hip and knee reconstruction
- Video arthroscopy
- Ligament reconstruction
- Artificial disc replacement surgery

To learn more about our orthopaedic services visit CHISIAlexiusHealth.org.
