

# *Urology and Robotic Surgery*

Our urological team provides the latest and highest quality urologic care to our patients. Our physicians, in addition to providing general urologic care, have specific areas of expertise to assure that the most complex problems, including cancers, are managed by experts. Our urologists have extensive experience diagnosing, managing and treating the full spectrum of urological disorders.

The minimally invasive da Vinci system uses the latest surgical and robotics technologies and is well-suited for delicate urologic surgeries. CHI St. Alexius Health in Bismarck uses the latest da Vinci robotic system in North Dakota. Visit with your provider to see what treatment options are available for you.
